

Hi there,

We would be training you in further PHP programming, and the language of the instruction would only be English.

Hence, this test is not just to see your programming skills but also your understanding of the English language.

If you have any questions or doubts, please feel free to escalate.

1. Open a connection to any website of your choice using libcurl.
2. Find and save the title of the website using a specific method called regular expression.
3. Connect to a mysql db server.
4. Save the website's URL and title to the mysql database.
5. Make sure to handle the errors properly if we can't connect to the website or mysql database.
6. Provide the final php file and SQL file (including its structure and data) in a drive folder with sharing enabled and access - OPEN TO ALL

> We would need to test your abilities and the depth of your understanding, do not attempt to cheat,ask AI, copy, take help etc.

- > you will be disqualified, now or later.

> Be Honest 😊
